

Sterilis Needle Disposal

A safe way to dispose of sharps

(Personal Use Sharps Only)

Due to renovations to the Bonneville Fire Department, the sharps kiosk has been temporarily removed and will be unavailable as of January 9, 2026.

Please follow the steps below to safely dispose of sharps.

Step 1: Cap any personal-use needles

Step 2: Place needle in a heavy plastic container, such as a laundry detergent bottle

Step 3: Seal the bottle lid with duct tape and label the bottle “Do Not Recycle”

Step 4: Dispose of the bottle in the trash

Residents are also encouraged to explore alternative disposal options, such as checking with local pharmacies, or health care providers.
